

Rules for Laboratory Activity

1. An assignment received during the current week is due the following week (in case of exceptions, you will be notified). The penalty for each delay of one week is **1** point from the grade for that assignment.
2. For some assignments you will receive a simple additional requirement, which you must solve during the laboratory. The allotted time to solve the additional requirement is **maximum 1 hour**. The assignment is graded **only if** you solve the received requirement.
3. The maximum accepted delay for an assignment is **2 weeks** (after its due date).
4. The maximum number of assignments that can be graded in one lab is **3**.
5. The grade for an undelivered assignment is **0**.
6. Assignments suspected of fraud or plagiarism are graded **0**. Evidence of fraud or plagiarism during the examination will result in you immediately failing the exam.
7. Source code for each assignment and for the tests must be committed and pushed to the corresponding GitHub repository. Failing to do so will result in a grade of 0 for the considered assignment.
8. There will be **3** tests during the semester; **these cannot be repeated during the examination session** and must be taken with your own subgroup, or with the subgroup you have been attending lab activities with.
9. Some lab assignments will contain extra requirements. For each assignment, you may get bonus points, if you solve the additional requirements. The sum of your bonus points will be added to the final grade.
10. A minimum average of **5.00** (no rounding) for the lab grade (weighted average considering lab assignments and lab tests) is required to enter the examination. If the average grade is less than 5, then the only possibility to take the examination is during the retake exam session, under the condition that the lab assignments are delivered. The maximum grade that can be obtained for the lab assignments in this case is **5.00**.
11. You must attend **at least 12** laboratories in order to be allowed to take the examination this year.
12. You must attend laboratory activities and tests with your own subgroup.
13. Laboratory assignments **cannot** be delivered by email, **nor** during another group's laboratory activity.

Feel free to ask questions during the laboratory and use your Microsoft Teams account outside it.
