Status	Finished
Started	Thursday, 15 January 2026, 2:07 PM
Completed	Thursday, 15 January 2026, 2:24 PM
Duration	16 mins 47 secs
Grade	9.60 out of 10.00 (96%)

Question **1**

Correct

Mark 0.40 out of 0.40

Infrastructure security is concerned with:

- ☐ operating system user
- ☒ cloud user ✓
- ☐ database user
- ☐ application user

Your answer is correct.

The correct answer is:

cloud user

Question **2**

Correct

Mark 0.40 out of 0.40

Which are two effective measures to improve infrastructure security?

- ☒ Reduce the attack surface as much as possible ✓
- ☒ MFA for the development team ✓
- ☐ MFA for the users
- ☐ Implement OAuth 2.0

Your answer is correct.

The correct answers are:

MFA for the development team,

Reduce the attack surface as much as possible

Question **3**

Correct

Mark 0.40 out of 0.40

The relationship between TLS and SSL is:

- ☐ They are not related
- ☐ TLS is built on top of SSL
- ☒ TLS is the successor of SSL ✓
- ☐ TLS handles communication while SSL handles identity verification

Your answer is correct.

The correct answer is:

TLS is the successor of SSL

Question **4**

Correct

Mark 0.40 out of 0.40

Which is the optimal approach for the least privilege principle when admin rights are required?

- ☐ Relax the security policies when needed
- ☒ Leverage features that enable just-in-time privileges ✓
- ☐ Enable MFA
- ☐ Create a dedicated admin user used only when needed

Your answer is correct.

The correct answer is:

Leverage features that enable just-in-time privileges

Question **5**

Correct

Mark 0.40 out of 0.40

FaaS stands for:

- ☐ Frontend as a service
- ☐ Functionality as a service
- ☒ Functions as a service ✓

Your answer is correct.

The correct answer is:

Functions as a service

Question **6**

Correct

Mark 0.40 out of 0.40

Which of the following represent HTTP safe methods?

- ☐ PATCH
- ☐ POST
- ☒ GET ✓
- ☒ HEAD ✓

Your answer is correct.

The correct answers are:

GET,

HEAD

Question **7**

Correct

Mark 0.40 out of 0.40

Which of the following represent possible type of consistency in cloud database models?

- ☒ strong consistency ✓
- ☒ eventual consistency ✓
- ☒ tunable consistency ✓
- ☐ no consistency

Your answer is correct.

The correct answers are:

strong consistency,
eventual consistency,
tunable consistency

Question **8**

Correct

Mark 0.40 out of 0.40

Which is true for a graph database model?

- ☐ relationships can't contain properties
- ☐ relationships are not directed
- ☒ contains nodes and relationships ✓
- ☒ nodes contain properties (key-value pairs) ✓

Your answer is correct.

The correct answers are:

contains nodes and relationships,

nodes contain properties (key-value pairs)

Question **9**

Correct

Mark 0.40 out of 0.40

What are Docker volumes good for?

- ☒ a way to persist data separate of the container's lifecycle ✓
- ☒ needed since containers are ephemeral and isolated ✓
- ☐ enable communication between multiple containers
- ☐ allow us to control network isolation separately

Your answer is correct.

The correct answers are:

needed since containers are ephemeral and isolated,
a way to persist data separate of the container's lifecycle

Question **10**

Correct

Mark 0.40 out of 0.40

Which of the following is not an Integration Service for cloud?

- ☐ API Gateways
- ☐ publish/subscribe services
- ☐ queues
- ☒ shared memory 
- ☐ workflow services

Your answer is correct.

The correct answer is:
shared memory

Question **11**

Correct

Mark 0.40 out of 0.40

Infrastructure as a Service is best used for:

- ☒ when ultra-high performance is a must ✓
- ☒ first migration stages (lift and shift) ✓
- ☐ when you need vendor lock-in
- ☐ when you don't want to be in control

Your answer is correct.

The correct answers are:

first migration stages (lift and shift),

when ultra-high performance is a must

Question **12**

Correct

Mark 0.40 out of 0.40

Which three options of the following are valid OAuth 2.0 flows?

- ☒ Authorization Code ✓
- ☒ Resource Owner Password Credentials ✓
- ☒ Authorization Code with PKCE ✓
- ☐ Owner Claim
- ☐ Pass-through Hash

Your answer is correct.

The correct answers are:

Authorization Code,

Resource Owner Password Credentials, Authorization Code with PKCE

Question **13**

Incorrect

Mark 0.00 out of 0.40

Which is the correct order complexity wise in decreasing order for NoSQL database models?

- ☒ graph, columnar, document, key-value ❌
- ☐ graph, document, columnar, key-value
- ☐ document, columnar, key-value, graph
- ☐ key-value, document, columnar, graph

Your answer is incorrect.

The correct answer is:

graph, document, columnar, key-value

Question **14**

Correct

Mark 0.40 out of 0.40

Monitoring of the virtual host is useful to ensure:

- ☒ knowing when to scale (up/down, in/out) ✓
- ☐ knowing your current price to pay
- ☒ if provider respects contracts (SLA) ✓
- ☐ knowing the size of the database

Your answer is correct.

The correct answers are:

if provider respects contracts (SLA),

knowing when to scale (up/down, in/out)

Question **15**

Correct

Mark 0.40 out of 0.40

What are containers useful for?

- ☒ creating similar environments ✓
- ☐ keeping dependencies isolated from the application
- ☒ quickly provisioning dependencies locally ✓
- ☒ keeping computer clean ✓

Your answer is correct.

The correct answers are:

creating similar environments,

quickly provisioning dependencies locally,

keeping computer clean

Question **16**

Correct

Mark 0.40 out of 0.40

Which of the following components are not managed by the cloud provider in a Infrastructure as a Service model?

- ☐ Networking
- ☐ Storage
- ☒ Data ✓
- ☒ Operating System ✓
- ☒ Application ✓

Your answer is correct.

The correct answers are:

Application,

Data,

Operating System

Question **17**

Correct

Mark 0.40 out of 0.40

The CAP theorem referres to:

- ☐ Credibility, Accessibility, Performance
- ☐ Credibility, Accessibility, Partition Tolerance
- ☐ Capacity, Availability, Performance
- ☒ Consistency, Availability, Partition Tolerance ✓

Your answer is correct.

The correct answer is:

Consistency, Availability, Partition Tolerance

Question **18**

Correct

Mark 0.40 out of 0.40

Which two options are valid approaches for reducing the cold start issues for serverless compute?

- ☒ Call the function on a schedule ✓
- ☐ Use Docker
- ☐ Limit the concurrency of the function
- ☒ Reduce the package size ✓

Your answer is correct.

The correct answers are:

Reduce the package size,

Call the function on a schedule

Question **19**

Correct

Mark 0.40 out of 0.40

Which of the following approaches has the ideal coupling?

- ☒ Separated services communicating through a message queue ✓
- ☐ Separated services communicating through REST interfaces
- ☐ Services deployed together as a monolith
- ☐ Separated services communicating through RPC

Your answer is correct.

The correct answer is:

Separated services communicating through a message queue

Question **20**

Correct

Mark 0.40 out of 0.40

Which are some of the concerns when adopting a serverless architecture?

- ☒ You might not have enough control ✓
- ☐ Your system might not be able to handle big workloads
- ☐ It will likely be more expensive than IaaS
- ☒ Your system might overload other dependencies ✓

Your answer is correct.

The correct answers are:

You might not have enough control,

Your system might overload other dependencies

Question **21**

Correct

Mark 0.40 out of 0.40

When choosing cloud services, the price plan can be:

- ☒ Fixed ✓
- ☐ Transaction-based
- ☒ Dynamic ✓
- ☒ Tiered ✓

Your answer is correct.

The correct answers are:

Fixed,

Tiered,

Dynamic

Question **22**

Correct

Mark 0.40 out of 0.40

What are CDNs good for?

- ☒ improve security ✓
- ☐ reduce resources
- ☒ improve load times ✓
- ☒ optimize costs ✓

Your answer is correct.

The correct answers are:

improve load times,

optimize costs,

improve security

Question **23**

Correct

Mark 0.40 out of 0.40

A key-value database offers:

- ☐ ultra low but not consistent latency
- ☐ high but not consistent throughput
- ☒ high and consistent throughput ✓
- ☒ ultra low and consistent latency ✓

Your answer is correct.

The correct answers are:

ultra low and consistent latency,
high and consistent throughput

Question **24**

Correct

Mark 0.40 out of 0.40

In a cloud environment, vertical scalability means that:

- ☐ it is compatible only with stateless applications
- ☒ it doesn't require additional components ✓
- ☐ it doesn't require restarting the service
- ☒ it might be the only approach for certain components (RDBMS) ✓

Your answer is correct.

The correct answers are:

it doesn't require additional components,

it might be the only approach for certain components (RDBMS)

Question **25**

Correct

Mark 0.40 out of 0.40

Which two options of the following could be considered identity providers (IdP)?

- ☐ Resource Servers
- ☒ Custom built OpenID Connect systems ✓
- ☐ SaaS services
- ☒ Social platforms such as Facebook and Google ✓

Your answer is correct.

The correct answers are:

Social platforms such as Facebook and Google,

Custom built OpenID Connect systems
